Q4 Task Information
You are about to participate in an experiment on the economics of decision-making.

We estimate that this will take **35 minutes** on average. But you can take more than that, or less. The time you take depends exclusively on how much effort you want to put into making good decisions.

You will get **${e://Field/show_up_fee_text}** just by completing the task.

Note that £1 is equivalent to approximately $1.30 (although exchange rates may vary).

Quitting the Task

You can quit the task at any moment, but if you do not complete it you will not receive any payment.

Q757 Subject information and informed consent form **Who is responsible for the study?** Responsible for the execution of the study and therefore for the processing of your data:

Suanna Oh
Paris School of Economics
48 Bd Jourdan, 75014 Paris
France

What are the purposes of the study? The purpose of this study is to improve our understanding of human behavior in economic contexts. We are interested in natural, unbiased behavior. Hence, no details on the background of this research project is given beforehand, which is in accordance with the standard in experimental economics. All necessary information will be provided in due time. **What happens to my data?** All participating employees and scientists work in accordance with the provisions of the Data Protection Regulation, the Federal Data Protection Act and the relevant State Data Protection Acts. For this project, we cooperate with research institutions, universities, institutes or laboratories in the EU. They are also obliged to comply with the relevant data protection regulations. Immediately after the collection, your data will be stored anonymized and then statistically analysed. No conclusions about your person can be drawn from these results. Your data will be stored by a technical service provider outside the EU. We have taken all necessary precautions and concluded all contracts which are necessary in order to comply with data protection. Even if the service provider is not located in the EU, your data is secure as we have concluded contracts with the service provider designated for this purpose in the EU. For this study, we collect "special categories of personal data", in particularly data revealing migration background (racial or ethnic origin - term according to Art. 9 GDPR), political opinions, religious or philosophical beliefs, which we use only for research purposes and solely with your consent.

Q764 Section 2
This section contains 38 questions. For these questions, you will receive feedback about the quality of your responses based on the following procedure:

At the end of the experiment, we will randomly choose **three questions** from this section and ask you to tell us the **same answers you gave previously**. You will earn an extra **1 point** for each of the same answers you provide, so that you can earn up to **3 points**. These points have **no monetary value**, but indicate high-quality responses. The questions in this section ask for your personal opinion or involve solving simple problems. Your opinions are unlikely to change over the course of the survey, and you can always get the same answer on a problem by correctly solving it again. Therefore, by simply **answering the questions in this section carefully**, it should be easy for you to **give the same answers you gave previously**, which will **earn you more points**. To encourage you to make an active choice on each question, the answer options on the randomly selected questions may be worded slightly differently and their order may be shuffled.

We use this procedure because we would like you to pay attention and put effort into answering the questions in this section.

Q850 Please read the following passage carefully, and then answer the question at the bottom. Mrs Smith is going shopping with her son Tom. They are looking for a present for Mr Smith's birthday. Mrs Smith wants to buy him a new camera and Tom wants to buy him a jumper. They drive to the department store on the high street. Mrs Smith uses the escalator to go to the Electrical Department on the third floor and Tom takes the stairs up to the Men's Clothing Department on the second floor. When she gets to the Electrical Department she finds that cameras are sold in the Photography Department on the first floor. She takes the elevator down and asks the sales assistant there for some help. She doesn't know much about cameras and needs some advice. He recommends an automatic camera by Olympus, but it is too expensive. She asks him if he has anything a little cheaper and he tells her about a special offer on the Pentax range. It still seems expensive so she thanks the assistant and decides to shop around first. Meanwhile, Tom is looking at the jumpers. He only has £10 to spend so he can't afford most of them. He sees his mother and they decide to go to the smaller shops round the corner. Where did Mrs Smith find cameras being sold?

Q880 Recent research on decision making shows that choices are affected by context. Differences in how people feel, their previous knowledge and experience, and their environment can affect choices. To help us understand how people make decisions, we are interested in information about you. Specifically, we are interested in whether you actually take the time to read the directions; if not, some results may not tell us very much about decision making in the real world. To show that you have read the instructions, please ignore the question below about how you are feeling and instead check only the "none of the above" option as your answer. Thank you very much. Please check all words that describe how you are currently feeling.
